PROFESSIONAL SUMMARY

Senior Frontend Engineer and Frontend Team Lead with 6+ years of experience building enterprise-scale web applications using React, TypeScript, and JavaScript. Led a team of 8 UI developers across multiple product lines while remaining hands-on with complex frontend development, component architecture, state management, and production delivery. Experienced in frontend performance optimization, reusable UI development, code reviews, testing, and cross-functional collaboration, with a strong focus on building maintainable, high-quality user interfaces.

TECHNICAL SKILLS

Core Stack	React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux
Frontend Engineering	Component Architecture, Reusable Component Libraries, State Management, REST API Integration, Responsive Design, Cross-Browser Compatibility
Performance	Code Splitting, Lazy Loading, Asset & Bundle Optimization, Lighthouse Audits, Chrome DevTools Profiling
Testing & Build	Jest, Unit Testing, Vite, Webpack, Docker
Engineering Practice	Code Review, Agile / Scrum, Sprint Planning, Mentoring, Production Debugging, Cross-Functional Collaboration
Version Control & Tools	Git, GitHub, Jira, SVN
AI-Assisted Development	Claude, Augment Code
Additional Technologies	Angular, Ionic (Android / iOS), React Native, Bootstrap, Express.js, MongoDB, Python

PROFESSIONAL EXPERIENCE

Perpetuuti Technosoft	Chennai, India Sep 2022 – Jul 2026
Team Lead, UI Engineering	Apr 2024 – Jul 2026
- Led sprint planning, task allocation, and Agile delivery for a team of 8 UI developers across three concurrent product lines while remaining hands-on in the codebase. - Owned end-to-end frontend delivery for Continuity Patrol and Bot Patrol (React, TypeScript) and the MHADA (Maharashtra Housing and Area Development Authority) portal. - Implemented the most complex UI modules personally, keeping architectural decisions grounded in the production codebase. - Ran code reviews across React and TypeScript codebases through GitHub pull requests, enforcing coding standards, type safety, and maintainable component architecture. - Established unit test coverage as a release requirement for every new feature shipped by the team. - Partnered with Product Managers, QA, and backend engineers to align UI implementation with API contracts and delivery timelines. - Mentored junior developers through technical guidance, design walkthroughs, and production debugging.	

Perpetuuti Technosoft — *continued***Senior UI Developer**

Sep 2023 – Mar 2024

- Designed and built complex React UI modules, translating product requirements into maintainable components.
- Optimized load and rendering performance through code splitting, lazy loading, and replacing raster assets with SVG, validating every change with Lighthouse audits in Chrome DevTools.
- Standardized state management by implementing Redux consistently across all application pages, replacing inconsistent page-level patterns with a single predictable data flow.
- Built reusable UI components adopted across product modules, cutting duplicated markup and accelerating delivery.
- Wrote Jest unit tests to protect core UI logic against regressions and tracked defects to closure in Jira.
- Containerized the frontend with Docker for consistent local and deployment environments.

UI Developer

Sep 2022 – Aug 2023

- Developed responsive, cross-browser UI components with React, Angular, JavaScript, HTML5, and CSS3 across Vite and Webpack build setups.
- Built the Flame Detection cross-platform mobile application for Android and iOS using Ionic and React, delivering both platforms from a single shared codebase.

Tawny Solutions

Chennai, India

Frontend Developer

Jul 2020 – Jul 2022

- Delivered design-accurate websites and web applications for multiple clients over two years.
- Partnered directly with clients to assess existing applications and translate requirements into frontend implementation, integrating data from backend services.

PERSONAL PROJECTS**Sentivue | React, JavaScript**github.com/Hemanth2053/Sentivue

- React frontend for a video surveillance platform, delivering live IP-camera streaming directly in the browser.
- Rendered AI detections and ANPR results in real time alongside reporting dashboards with record filtering and export.
- Built a multi-camera grid rendering simultaneous live feeds with detection overlays synced to each stream, structuring state so continuous detection updates avoid unnecessary re-renders.

FlowForge | React 19, TypeScript, Node.jsgithub.com/Hemanth2053/FlowForge

- Workflow automation platform pairing a visual composer with durable server-side execution.
- Layered a React 19 single-page application over a Node.js and TypeScript service, with per-run execution tracking, multi-tenancy, and versioned workflow definitions.

EDUCATION**M.Sc. Physics** — D. G. Vaishnav College, Chennai

2017 – 2019

B.Sc. Physics — Govt. Thirumagal Mills College, Vellore

2014 – 2017
